Oracle forms 11g formsweb. cfg parameters

Configuring Oracle Forms 11g environment

Oracle forms 11g formsweb. cfg parameters.

This is also read by the Forms EM Overview page to show the # current Forms status. default.fontMap.defaultSize 900 Represents the default fontSize. Now Im configuring formsweb.cfg and I think that the better is use the java plug 1.6.0.23, because it is the last and can work with 3.6..6 Firefox. # If you create your own page, you should set this parameter to point to it. I have installed Oracle Fusion + Weblogic + Forms & Reports in a RedHat 5 server. # USER PARAMETERS # ----- # These match variables (e.g. %form%) in the baseHTML file. # Parameters which are not marked as System parameters are User parameters.
