Pour voir la TV via VLC veuillez suivre ces pas, mais nous vous informons que vous aurez besoin de l'URL du streaming que vous souhaitez voir. Cliquez sur Media dans la barre d'outils supérieure et cliquez ensuite sur l'option Open Network Stream... Option de VLC pour ouvrir un streaming online Dans le cadre Please enter a network URL écrivez ou collez l'adresse du streaming de la chaîne de télévision souhaitée pour être vue en ligne. Ensuite appuyez sur Play en bas à droite. Introduction de l'URL du stream et lecture La lecture devrait commencer dans quelques secondes. Emission d'un TV en streaming via VLC Où trouver les URL de streaming des contenus ? En règle générale, les chaînes généralistes qui émettent à code ouvert ne posent pas vraiment problème à l'utilisateur car ce dernier peut régler l'émission via les clients qu'il préfère, et donc ont pour habitude de rendre public l'information des URL dans lesquelles le contenu est émis. Dans le cas des chaînes privées ou de paiement, la chose se complique, bien évidemment ses responsables ne sont pas disposés à encourager le piratage de contenus, même s'il existe des formes d'accéder au code web pour extraire de là, les URL recherchées. Une recherche sur Internet vous permettra d'accéder rapidement à des milliers d'adresses web qui émettent un contenu en streaming, il existe une multitude de pages web qui se consacrent à les compiler. Faites une recherche parmi les résultats actualisés et en peu de secondes, vous obtiendrez les URL que vous cherchez pour les insérer dans VLC et profiter du streaming de vos chaînes préférées, qu'il s'agisse de chaînes d'information, de film ou de séries, d'événements sportifs, de documentaires... L'offre dans ce sens est aussi large que vous pouvez l'imaginer. VLC for Android is a full port of VLC media player to the Android™ platform. It can play any video and audio files, network streams and DVD ISOs, like the classic version of VLC. VLC features a full music player, a media database, equalizer and filters, and numerous other features. We need help to test VLC under a variety of devices. Please join us on our forum to provide feedback and get assistance with any issues you might have. Send us phones if you are a phone manufacturer or have spare phones, please send them to us :) Contact us. Decoding performance VLC can decode video in software and hardware mode. Hardware decoding often provides better performance but is not supported on all devices. If your device Android version is below 4.3, software decoding may be the only supported option for you. Documentation We have documentation available on our wiki - please have a look here. VLC media player is a free and open source cross-platform multimedia player that plays most multimedia files as well as discs, devices, and network streaming protocols. This is the port of VLC media player to the Android™ platform. VLC for Android can play any video and audio files, as well as network streams and DVD ISOs, like the desktop version of VLC. VLC for Android is a full audio player, with a complete database, an equalizer and filters, playing all weird audio formats. VLC is intended for everyone, it has no ads, no in-app-purchases, no spying and is developed by passionate volunteers. All the source code is available for free. Features ----- VLC for Android™ plays most local video and audio files, as well as network streams (including adaptive streaming), DVD ISOs, like the desktop version of VLC. All formats are supported, including MKV, MP4, AVI, MOV, Ogg, FLAC, TS, M2TS, Wv and AAC. All codecs are included with no separate downloads. It supports subtitles, Teletext and Closed Captions. VLC for Android has a media library for audio and video files, and allows to browse folders directly. VLC has support for multi-track audio and subtitles. It supports auto-rotation, aspect-ratio adjustments and gestures to control volume, brightness and seeking. It also includes a widget for audio control, supports audio headsets control, cover art and a complete audio media library. NOT A BENE ----- This version is for all devices except ARMv6 devices. They will be supported in a future release. Permissions ----- VLC for Android needs access to : • "Photos/Media/Files" to read your all media files :) • "Other" to check network connections and hide the streaming parts when needed. Permission Details : • It needs "read the contents of your USB storage", in to order to read your media files on it. • It needs "modify or delete the contents of your USB storage", in order to allow deletion of files. • It needs "full network access", to open network and internet streams. • It needs "prevent phone from sleeping" in order to prevent... your phone from sleeping when watching a video. • It needs "change your audio settings", in order to change audio volume. • It needs "modify system settings", in order to allow you to change your audio ringtone. • It needs "view network connections" in order to monitor whether device is connected or not, to hide the streaming parts. - For Android TV app only: • It needs "to receive the ACTION_BOOT_COMPLETED that is broadcast after the system finishes booting" to set recommendations on Android TV launcher screen. by Christine Smith • 2022-07-12 16:34:41 • Proven solutions How do I stream from VLC to my Smart TV? If you have a similar question like above or Does VLC support casting videos to TV? Then you can find the answers in this article. The VLC media player can be used on any device today because it is available for multiple platforms. The VLC media player is a free and easy-to-use media player and allows you to stream your videos from your device to TV. Using a VLC stream to TV is available on a local network. Read more to learn how to use VLC cast to TV on Windows/Mac and the best alternative to VLC to cast videos to TV with only four simple steps. 1. Stream Video from VLC to TV on Windows VLC is an open-source software to play videos, and it allows you to stream videos from VLC to TV on Windows as well. VLC can play videos on your devices using your local home network or internet too. You can use the VLC web interface as a remote control to control your playing videos from anywhere at your home. Keep in mind that you need a high-speed internet connection to stream videos over the internet. Without the internet, you can't stream videos. Step 1: Launch VLC on your Windows PC and choose the Stream option from the Media menu. Step 2: Now Open media popup window will open in front of you, and now you can stream media from all available options. First, please add files from the file tab which you want to stream. Click on the Add button and add the files here. Now click on the Capture Device tab and select Desktop in the front of the Capture Mode option. After that, click on the Stream button. Step 3: Now, it will display the output window. The first list is the media file you want to stream; click on Next to continue. Step 4: Now, the next Windows Destination option is there. Here you have to select the Destination where you want to stream your Media. Select HTTP from here and then click on the Add button. You can also check the Display Locally option, which will stream media on your laptop too so you can know the media file is playing correctly on other devices. Click on the Next button now. Step 5: Now, you can customize the HTTP setting. It is better to keep in the default setting and click on the Next button. To save network bandwidth, you can keep transcoding to the lower quality. Step 6: In this window, you don't need to make any changes; click on the Stream button. If you were selected to display locally option, then the media will start playing on your computer. Your firewall will ask your permission if your firewall is enabled and then click on the Allow Access button. Step 7: Click on the Media menu and choose Open Network Stream to connect to a stream. Step 8: We are assuming that you have used HTTP. Now find out your IP address and enter an address like . Note: If there is the custom path specified by you for the HTTP stream, then you have to specify the custom path here. Enter the address like in the address box. Finally, click on the Play button now. Step 9: Now, your video will start playing on your other devices. 2. Use VLC to Cast Video to TV on Mac VLC player is available for Mac users as well for free of cost. You can also stream videos to Apple TV using VLC for Mac devices. Using a VLC media player for Mac, you can easily stream videos from Mac to TV. For a situation, we are using a Mac computer as a source and Windows as the destination Machine. You can stream from VLC to TV on Mac also by following the same steps. Step 1: First of all, you must search for your Mac's local address or name. To search it, go in the Preference > Sharing and now copy the local address name in front of the computer name. Save this name anywhere for later use. Step 2: Now, on your Mac device, launch a VLC media player and go in the File menu from the top left and then select Streaming/Export Wizard. Now Check the Stream to Network option and press Next. This option allows you to stream movies and videos. Step 3: Now, you have to choose an input file from your computer. Choose Select a Stream and browse the file from your local hard. Click the Next button to proceed. Step 4: Now, you have to choose HTTP here in this Windows to play videos on more computers. There is no need to enter the Destination; leave the option empty. Step 5: Now, on the Transcode page, you can choose the compression format if you want, this is not necessary, and in my

case, I'd leave it blank. Now press the next button. Step 6: In the Encapsulation network window, you can choose now how your video stream will be encapsulated. As for me, I would choose the MPEG TS format. Step 7: In the next window, it will show you some additional streaming options. Here I am leaving them blank without touching. Step 8: Now, click on the Next button and finally click on the Finish button. Step 9: Now, on your Windows computer, launch a VLC media player and click on Media> Open Network Stream. Step 10: Now write the address which you have copied and saved in Step 1. You have to enter the below address. My address will be entered like this: . Note that you must add 8080 at the end of the address. Step 11: Now, videos of your Mac will be started playing on the Windows computer.
